Cebu, Philippines | cchrispaolo@gmail.com | +63 946 875 2328

PROFESSIONAL SUMMARY

Driven Computer Engineer, Software Engineer and a virtual assistant with a proven track record in full-stack web development, system optimization, and building user-centric applications. Adept at leveraging JavaScript, Node.js, and PostgreSQL to deliver practical solutions—from complex commuter navigation tools to complete hotel management systems. Strong problem-solver dedicated to writing clean, reliable code and collaborating across teams to meet dynamic technical needs.

SKILLS

Programming Languages: JavaScript, C/C++, Python, Java

Web Technologies: HTML, CSS, JavaScript, Node.js, WordPress

Database & Other Tools: PostgreSQL, AI Workflow Integration / AI Automation (e.g., n8n.io), MySQL, Supabase, Microsoft Excel, Google Sheets, Microsoft Access

Soft Skills: Willingness to learn and adapt, Project Management, Cross-Functional Collaboration, Critical Thinking

WORK EXPERIENCE

CIS合同会社 | Software Engineer Intern | 2025 - 2026

- Developed clean and reliable code for company projects, helping improve tools used by teams across CIS.

Freelance Company | QA Specialist and SaaS Developer | 2025 - 2026

- Accurately encoded project data, reports, and documentation into the company's system to maintain organized digital records.

EWU Media LLC | Data Entry Specialist - Outsource | 2024 - 2025

- Handled data input and management tasks with precision, maintaining and updating company records efficiently.

Office of the Building Official | Civil Engineer Assistant (Training) | April 2022 - June 2022

- Assisted in coordinating the approval process for blueprints by facilitating signatures from architects and civil engineers.

PROJECTS

Banly | WordPress Developer

- Main WordPress Developer for "Biz-Sapo", a service providing accounting and bookkeeping outsourcing for SMEs.

Hotel Management System | Software Development Project

- Full-stack hotel operations app featuring real-time room status dashboard and automated billing using PostgreSQL.

ReceiptBot | Discord Bot

- Node.js Discord bot designed to process image receipts utilizing Gemini for text extraction.

Kana Quest | Gamified Web Application

- Interactive web game helping students master Japanese writing systems (Hiragana and Katakana).

Electrical Billing System | Java Console Application

- Console-based application built with core OOP fundamentals to automate monthly electricity bill calculations.

Logistics Flow System | Container Flow Tracker

- Internal dashboard streamlining back-office operations and container management.

NexusShift | WFH Monitoring System

- Tracks the screen of the workers every switch tabs

Material Control | Inventory and Receipt Tracker

- Tracks the receipts and the materials that are bought to provide transparency to the company.

SugboGas | Fuel Price Tracker

- a community-driven web application that allows drivers in Cebu to track, compare, and report real-time fuel prices across local gas stations.

GovHub | Government Document Applications

- a community-driven web application that provides citizens in Cebu with exact, real-time checklists and verified updates for local government documents so they never get turned away for missing a document.

CERTIFICATIONS

Cisco Networking Academy (NetAcad) | Student | August 2025 - December 2025

- Completed coursework in Data Analytics, focusing on the data life cycle, visualization with Tableau, and data cleaning techniques.

Data Analytics Level III | 120 Hours Tesda Course | April 8 2026 - May 9, 2026

- Data Analytics Level III course provides participants with intensive training in advanced data processing, analysis, and visualization skills.

Solana x AI Hackathon | 3rd Place | October 12, 2024

- Awarded 3rd place at the Solana x AI Hackathon on October 12, 2024, this achievement recognizes the successful development of an innovative project at the intersection of artificial intelligence and blockchain technology within the Solana ecosystem. .

HTML Fundamentals | CodeCred | March 9, 2026

- Validates foundational HTML skills for creating accessible, standards-compliant web pages, laying the groundwork for further web development.

Cebu Solution Fest | Finalist | June 17, 2026

- Developed and deployed a functional prototype under strict deadlines, demonstrating strong system architecture and responsive UI design to a panel of industry judges.
